Pilot XL Task Chair & Stool

You don't just need seating that the "average employee" will be comfortable in, you need seating that YOU will be comfortable in—all the time. If you have found that other chairs just don't measure up, Pilot XL is ready to welcome you aboard.

Big and tall users will appreciate the XL Task Chair and Stool's expansive 24" wide seat, which features a waterfall edge to relieve pressure on the thighs as well as their high back that provides gentle support to the entire spine. To further prevent fatigue, layers of plush, resilient foam envelop both the seat and back.

Designed for round-the-clock use, Pilot XL seating won't just be comfortable the first time you use it, it will be comfortable every time. A heavy-duty frame including an oversized steel J-bar and reinforced mechanism guarantee it. And because comfort is nothing without safety, the Pilot XL Stool is equipped with an oversized steel base and foot ring for additional stability.

With so many reasons to make Pilot seating your own, the only decision you need to make is where you want it to take you.

The seat height of the Pilot XL Stool is continuously adjustable over an expansive 9" range with the use of a super heavy-duty cylinder.

Adjustable loop arms have a vertical range of 2.5" for maximum comfort.

Pilot's multifunctional mechanism allows you to free float, lock the seat and back in a reclined position, or lock just the back angle.

Glides can be specified on the Pilot XL Stool to ensure that it will remain stationary on any flooring surface.
