

High Jump Spec Sheet Description

ACI has a commitment to the highest standards of quality and safety for your school and students. This results in a product that not only meets the athletic and safety needs of your students, but also gives your school an attractive product you can be proud of.

Never underestimate the power of School Spirit!

The High Jump Landing Pad is composed of ILD 17 foam, which is strong enough to withstand punishment without losing quality, while still allowing for a soft and safe landing for your students.

All pads are double stitched and re-enforced in critical areas to allow your High Jump Pad to remain reliable through multiple uses without loss of utility or appearance.

Also, for an additional fee you can proudly display your school spirit with lettering and printed logos to represent your school.

ACI is dedicated to giving you the highest quality in safety, appearance, and longevity, with a reliable product you can be proud of.
